

hydrocarbylsulfanyl nitrenes

Nitrenes substituted with *hydrocarbyl*sulfanyl groups, $\text{RSN} : \leftrightarrow \text{RS}^+ \equiv \text{N}^- \leftrightarrow \text{RS} \equiv \text{N}$. Sulfenyl nitrenes is a older synonymous term. E.g. MeSN methylsulfanylnitrene or methylthionitrene. The synonymous term thiazynes (from the third canonical form; confusable with the hetarynes derivable from 1,2- and 1,4-thiazine) is best avoided.
