

nitroxides

Nitroxide is the parent name used by Chemical Abstracts Service for $\text{H}_2\text{N}-\text{O}\cdot$, e.g. $(\text{ClCH}_2)_2\text{N}-\text{O}\cdot$ bis(chloromethyl) nitroxide. The IUPAC name is bis(chloromethyl)aminoxyl. Nitroxides should not be used as a class name for aminoxyl radicals.

See *aminoxyl radicals*.
