

11. OTHER OPTICAL METHODS

11.1 Introduction

This chapter contains terminology in the fields of photochemistry and light scattering and is based on 1) the glossary of terms used in the 'Glossary of Terms used in Photochemistry', Pure and Appl. Chem., 60 (1988) 1055, prepared by the Photochemistry Commission of the Organic Chemistry Division of IUPAC and 2) on Appendix II - Definitions, terminology and symbols in colloid and surface chemistry, Manual of Symbols and Terminology for Physicochemical Quantities and Units, PART 1.14: Light Scattering, published in Pure and Appl. Chem., 55 (1983) 931.
